Each glass has its own unique characteristics. Because the glass can have different thickness we have provided numerous fittings to ensure the glass is properly secured.

Please utilize the washer that best fits your glass. (2 provided)

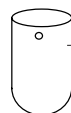

Two different fittings are provided Please utilize the one that best fits your glass.

Two nuts are provided that can fit different sections of the socket as needed. They can be utilized in conjunction with the spacer if needed.

Please ensure the glass is level before locking the nut(s) down with the plastic tube wrench.

Screw-on glass shield over bulb.

INSTALLATION SHOULD BE CARRIED OUT BY YOUR LOCAL ELECTRICIAN.
