

# BRICK LED STEP LIGHTS

## 8" Die-Cast Aluminum Face Plates

Architectural LED step lights with die-cast aluminum face plates. Brick LED step lights can be used indoors or outdoors to efficiently illuminate a change in elevation, provide a path of light, light a staircase or act as a safety night light. The architectural louver and shroud diecast aluminum face plate creates a beautiful non-glare source of LED light to guide the way. Brick LED step lights are available in horizontal louver, shroud and lensed face plates in brushed nickel, bronze or white finish.
