

IOLITE CAN-LESS TRIMLESS

4" Specification Grade Downlights No Housing Needed!

Trimless installations have no exposed trim flange and are considered the premium finishing technique. The trimless effect requires the installation of the trimless mud ring after the drywall is installed. A professional drywall finisher floats the ceiling to blend in the mud ring, sands and paints. The reflector is then inserted into the ring and the result is a spectacular, minimalist appearance with no flange.

FEATURES

- No housing required - IC Air-Tight rated
- Easy installation for remodel or new construction applications
- Components ordered a la carte (four part system)
- Same appearance as standard Iolite trim from below the ceiling
